Summary

Full-stack developer with hands-on experience building production-ready and AI-powered web applications. Strong foundation in C++, Data Structures & Algorithms, and the MERN stack, with practical experience integrating Generative AI, secure authentication, and scalable REST APIs.

Experience

Full Stack Developer (Freelance) | Reneson

2025

- Redesigned and developed the complete company website during its transition from **DataTurtle** to **Reneson**, implementing new branding, UI/UX, and architecture.
- Built a full-stack service portfolio platform showcasing company services, projects, and client offerings.
- Developed a secure **admin dashboard** enabling dynamic management of projects, services, and website content.
- Implemented backend APIs, authentication, and database integration for scalable content management.
- Managed full deployment including hosting, domain configuration, and production release.

Projects

Just Prompt – AI Image Editor & Generator | GitHub 🐙 | Live 🌐

- Built a full-stack AI-powered image editing platform allowing users to upload images and modify them using text prompts or one-click presets.
- Implemented advanced features including **Face Fix**, **AI Upscaling**, and automatic prompt-based image enhancement.
- Integrated multiple AI services such as **Gemini 2.5 Flash Image**, **FlyMyAI**, and **Claid**.
- Developed secure authentication using **Google OAuth 2.0**, Email OTP, and **JWT with HTTP-only cookies**.

CarRental – Full-Stack Web Application | GitHub 🐙 | Live 🌐

- Developed a car rental management platform enabling users to browse, book vehicles, and owners to manage listings and bookings.
- Built responsive frontend using **React**, **Vite**, **Tailwind CSS**, and **React Router**.
- Implemented backend APIs with **Node.js**, **Express.js**, **MongoDB**, and **JWT authentication**.
- Integrated **Multer** + **Cloudinary** for secure image uploads and storage.

Krishi Mitra – AI Farming Assistant | Live 🌐

- Built a multimodal AI farming assistant supporting voice, text, and image-based queries for farmers.
- Integrated **Gemini LLM**, **SoilGrids**, and **OpenWeather APIs** to provide real-time agricultural insights.
- Implemented crop disease detection and pesticide recommendations using AI-based image analysis.
- Developed a voice interaction system with speech recognition and contextual AI responses.

Technical Skills

Programming: C++, JavaScript, Python

Frontend: React.js, Tailwind CSS, HTML, CSS, React Router, Context API

Backend: Node.js, Express.js, REST APIs, JWT, Multer, Cloudinary, OAuth 2.0

Database: MongoDB, Mongoose

Tools: Git, GitHub, Postman, Vercel, MongoDB Atlas

AI: Gemini LLM, Multimodal AI (Text, Image, Voice), Image Generation APIs

Education

Bachelor of Technology in Computer Science

2023 – 2027

Government Engineering College, Rewa

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, OOPS, Operating Systems, Internet and Web Technology

Additional Information

Top Performer in **Code War Fest X3.0**

Cleared **TCS CodeVita Season 13 Round 1**

Solved **200+** **Data Structures & Algorithms** problems across platforms
