Summary

Full-stack developer with hands-on experience building **production-ready and AI-powered applications**. Strong foundation in **C++**, **Data Structures & Algorithms**, and the **MERN stack**, with practical experience integrating **Generative AI**, secure authentication, and scalable REST APIs. Built real-world projects including an **AI image editing SaaS** and a **multimodal AI farming assistant**.

Projects

Just Prompt – AI Image Editor & Generator (MERN) | GitHub | Live

- Built a full-stack AI-powered image editing and generation platform allowing users to upload images, apply text prompts, or use one-click trending presets.
- Implemented advanced AI features including **Face Fix**, **AI Upscaling**, **Auto Mode**, re-run variations, and version history tracking.
- Designed a project-based workflow to organize image edits and maintain previous versions efficiently.
- Integrated multiple AI services such as **Gemini 2.5 Flash Image**, **FlyMyAI**, **Photocraft**, and **Claid**.
- Developed secure authentication using **Google OAuth 2.0**, Email OTP, and **JWT with HTTP-only cookies**.
- Built a fully responsive UI using **React (Vite)**, **Tailwind CSS**, Context API, and React Hot Toast.

CarRental – Full-Stack Web Application (MERN) | GitHub | Live

- Developed a car rental management platform enabling users to browse, book vehicles, and owners to manage listings, bookings, and revenue.
- Designed an interactive and responsive frontend using **React**, **Vite**, and **React Router**.
- Built a secure backend with **Node.js**, **Express.js**, **MongoDB**, implementing role-based access and **JWT authentication**.
- Integrated **Multer** + **Cloudinary** for image uploads and media storage.
- Created RESTful APIs for booking workflows, availability management, and admin operations.

Krishi Mitra – AI Farming Assistant (MERN + Gemini API) | GitHub | Live

- Built a multimodal AI-powered farming assistant providing voice, text, and image-based solutions in local languages for farmers.
- Integrated **Gemini LLM**, **SoilGrids**, and **OpenWeather APIs** to deliver context-aware, real-time agricultural insights.
- Implemented crop disease detection and pesticide recommendations using AI-based image analysis.
- Developed a voice interaction system with live speech recognition, conversation memory, and natural AI responses.
- Deployed a secure and scalable MERN stack application with **JWT authentication** and cloud hosting.

Technical Skills

Programming: C++, JavaScript, Python

Frontend: React.js, Tailwind CSS, HTML, CSS, React Router, Context API

Backend: Node.js, Express.js, RESTful APIs, JWT, Multer, Cloudinary, OAuth 2.0, Secure OTP-based Authentication

Database: MongoDB, Mongoose

Tools & Deployment: Git, GitHub, Postman, Vercel, MongoDB Atlas

AI & Generative AI: Gemini LLM, Multimodal AI (Text, Image, Voice), Image Generation & Editing APIs

Relevant Coursework

- | | | |
|-------------------|-------------------------------|-------------------------------|
| • Data Structures | • Database Management Systems | • Operating Systems |
| • Algorithms | • OOPS | • Internet and Web Technology |

Education

Bachelor of Technology in Computer Science
Government Engineering College, Rewa

2023 – 2027

Additional Information

Top Performer in **Code War Fest X3.0**

Top Performer in **TechFest 2024 (REC)**

Solved **200+** **Data Structures & Algorithms** problems across platforms (LeetCode, GeeksforGeeks, etc.)
